Abstract

The company "InstaSI" was for many years on the market, and has a large number of successfully completed projects. After the interview and get acquainted with your organization, your wishes and opinions, we know that we are the right choice for you. We would like to offer you a unique, simple and attractive solution for social network "Instagram-like", and thus attract a large number of users on your network.

In the following short theses you can see specific details about this project:

- The goal of our company is the delivery of the desired software in the agreed period of time, we want to work with clients in order to obtain the best software.
- We want to deliver software with the unique and well-designed solutions, but also simple to use.
- Permanent cooperation with you, during the development of software, we are very important, because we want to output the product is exactly what you want.

About us

The company "InstaSI" is on the market for more than 10 years, founded the joint forces students with renowned Faculty of Electrical Engineering in Sarajevo. Behind us we have a multitude of successful projects and satisfied customers, as domestic and foreign markets.

First of all, our aim is to put client requests in the first place, because the motto of our company: "Ask your customers to be part of the solution, and do not look at them as part of the problem." We are absolutely sure that you as the output product can offer a service that is functional, safe, and very easy to use all its customers, which would result in the interest of a large number of users. Our completed projects speak about the quality of our software and services to customers is the best advertisement, and we are sure that you choose the best.

Goals

The new platform is to provide customers a safe and just environment where they can make new friends, expand existing ones, create and share memories, and through different mechanisms of interaction to be in contact with your friends, family and acquaintances. InstaSI has the aim of guaranteed data security, attractive design and no advertising or marketing content, creating an advanced, user-friendly environment for the general public, who will be able to enjoy in the newspaper information technology.
